JACK AND THE BEANSTALK, AND HOW I BECAME A GLAD FAN

In the fall of 1920 I got acquainted with Mr. C. W. Wood, the introducer of the gladiolus industry into our community. After paying him several visits, and spending hours and days discussing the beautiful blooms, I purchased my first stock from him. Through the courtesy of Mr. and Mrs. Wood I was induced to grow gladiolus bulbs commercially.

It was a long winter for me to wait for spring to come. Finally the time had come when I was to make my try at the new enterprise. My enthusiasm and ambition had got to its height. Mrs. Wood suggested planting a castor bean in my garden to eradicate the moles. After all was planted I continuously cared for the garden.

Time passed, very quickly blooms began to appear, the castor bean took possession of the garden. I fed it liquid manure and Nitrates. At the end of the season this bean stalk had gained the height of thirteen feet and eight inches. Having decided to keep this stalk, I cut it close to the ground and laid it away. The stalk is still ten feet and two inches tall. My youngest son is named Jack, he was five years old last summer, I decided to have a real Jack and the beanstalk, so I had this photo taken, the bean stalk was grown in 1921, the year of many happy moments and the dawn of a new enterprise to our gardens. Years have never been long enough to accomplish my ambition. If you want to spend many happy moments and have time pass quickly get into the glad game.

IRIS

This list includes the intermediate, early and late bearded flag Iris. Every collection should have some of each of the three, to prolong the blooming season. SELECTION

You will see the blooming dates the Spring of 1928, as they came into bloom, continuing from one to two weeks according to weather conditions. In making your selection accordingly you can enjoy the beautiful Iris flowers for a whole month with a limited investment.

CULTURE

Any good rich porous soil will do. If not, work in a handful of bone dust around each plant. Use no fresh manures of any kind. Do not plant these Iris in low wet soil.

PLANTING

We have had good results in transplanting irises any time in the growing season. Set the plants so the rhizomes are about level with the ground.

Special Gladiolus Collection

If you want to grow and enjoy some very beautiful flowers try any one of the following collections. They are made up of many long tested and tried cut flower varieties that thousands of florists are using every year to supply their trade. Our whole ambition is to grow and test the ones that are among the better cut flower varieties, and force well in the greenhouse as well as for out door purposes. The following bulbs are all pre-paid.

Collection No. 1—300 $\frac{3}{4}$ in. and up in 25 different colors for \$2.95.

Collection No. 2—125 small blooming size of many colors for \$1.00.

Collection No. 3—500 bulblets in many assorted colors, and three medium blooming size bulbs, for 25c.

DIRECTIONS FOR PLANTING

Plant in any rich, well drained soil. For bulblets make trench 3 to 4 inches deep, sow about 50 to the foot in narrow trench; in trench 5 to 6 inches wide sow 200 to the foot. For large flowers set larger bulbs 4 to 6 inches apart in single row 4 to 6 inches deep. Use no manure unless well rotted, or dried and pulverized. This can be used as a top dressing at planting and when flower spikes appear. A light application of Vigoro with the manure well worked into the soil will give excellent results. A good soaking with water after each application of fertilizer is very beneficial. Stir your soil after each watering when dry enough to work readily. Work soil deep at first and shallow when flower spikes appear.

RHUBARB

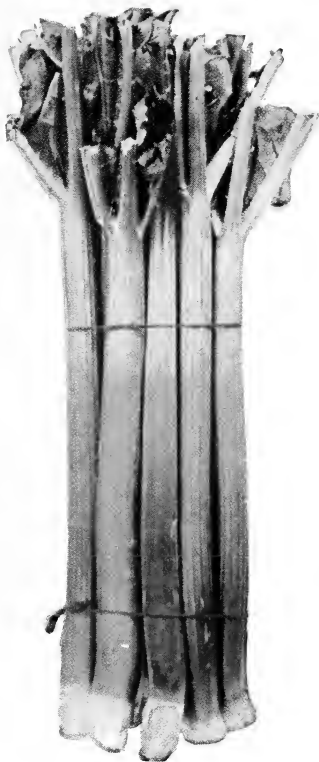

Giant Victoria, one of the best cooking and market varieties, strong, 2 year old roots, field grown. \$3.00 per 100; \$20.00 per 1000. F. O. B.

Special—50 roots for \$2.00, prepaid.

Southport Globe, red, 1 lb.,—30c; 5 lbs.—\$1.10; 10 lbs.—\$2.10, prepaid. By express collect, 15 lbs. and over, 13c per lb. Large sets, 20 lbs. and over, 8c per lb.

FIELD BEAN SEED

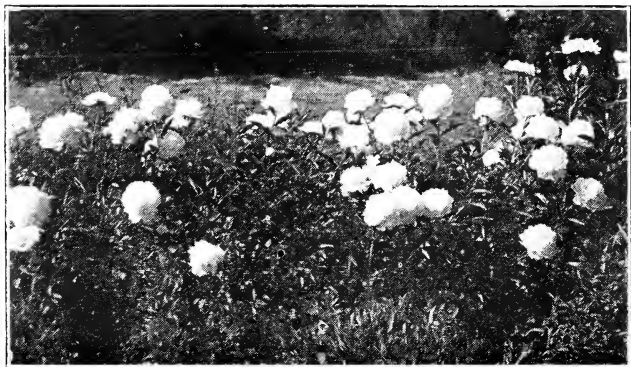

White Navy, 1 lb.—25c; 5 lbs.—\$1.15; 10 lbs.—\$2.25 postpaid. 10 lbs. or more, 12c per lb. F. O. B.

ASPARAGUS

Martha Washington, 2 year old roots, strong field grown stock. \$1.00 per 100; \$8.00 per 1000. F. O. B.

Special—50 roots for \$1.00, prepaid.

Variety Festiva Maxima

PEONIES

By all means plant a few peonies. They are one of the hardiest and finest flowers grown. By planting the early, mid-season and late varieties you may have blooms for a month. Each and dozen lots prepaid. 100 lots F. O. B. 25 lots sold at 100 rate.

PLANTING

Plant in any good soil that is well drained; fertilize the same as for Iris. In setting the plants have the eyes or buds come about level with the ground, as deep planting does not produce many blooms. September until the ground freezes is the best time to plant.

PLANTING INSTRUCTIONS

Plant bulbs in rich sandy soil, 4 to 6 inches deep about 2 to 3 feet apart. When about 8 inches high pinch out the terminal buds, leaving 4 to 6 pair of leaves on stalk. These will throw out side shoots. When flowering buds begin to appear pinch off all but the largest bud on each shoot. Work in about a foot from the stalk a handful of commercial fertilizer rich in potash and phosphates. In dry weather water frequently. All tall plants should be tied and staked. Work deep until the plant is about a foot high. Later cultivate shallow. Spray with "Black Leaf Forty" and "Bordeaux". If using dust of same ingredients apply while dew is on the plant. Both should be applied on under side of the leaf. Do not spray during heat of day nor use cold water.

Prices listed are prepaid. All listed at 100 rate may be purchased in lots of 25 at 100 rate.

Germaco Hotkaps

Earlier, More Profitable Crops

Germaco HOTKAPS can make many extra dollars for you this season. They are patented wax paper cones—"individual hothouses for each plant"—that completely cover them, and fully protect them from frost, wind, rain, ground-crusting, and insects. This is your assurance of earlier, bigger crops, and higher early-to-market prices. HOTKAPS are inexpensive and easy to use. One man "sets" over 2500 per day.

Write us about HOTKAPS, or order your season's supply now.

The above cut is of our youngest son Jack at the age of three years and one of our promising seedlings grown in 1928. Several applications of Vigoro account for the seedling's wonderful growth.

VIGORO

For Lawns, Gardens, Shrubs and Trees

Vigoro is more than a fertilizer. It is a specially prepared plant food for lawns, gardens, flowers, shrubbery and trees. Vigoro contains all the necessary elements to produce the desired results when applied to your lawn, garden or shrubs. It is odorless, easy to apply, using two pounds per 100 square feet. I have tried out Vigoro before listing it, the same as I do with all other articles listed, and find it to be one of the best plant and lawn foods on the market. A small folder on lawns and gardens will be sent free upon request. Price—25 lbs., \$1.75; 50 lbs. \$3.00; 100 lbs. \$5.00, not prepaid. Kindly write for prices on larger amounts.
